James Harrison is a singer / songwriter based in Bournemouth, he writes his own songs in a style loved by many loyal followers.

He has been playing guitar and piano for most of his life and his passion for music really shows through in his songs which capture his audience.

He plays covers from artists that have inspired him throughout his life such as, Paul McCartney, Cat Stevens, The Beatles, and many more great artists.

James also pays tribute to his father in his act, playing delightful songs written by his dad when he was in a very successful folk band called Saraband during the seventies.

James puts on a great show and appreciates his audience as they always appreciate him.

Since playing Wallingford festival last year he is now officially hooked on the great music and atmosphere and can't wait to get back to do it all again.
